-by Jinyu Wang
Kaiwen Zhu

This textfield will
take user input for
their user name.

Photo Login

Username:

Login

Check
Userinput
to see if
the text
entered is
a
username
stored in
the file. If
username=
= admin.
Goes to
Admin
control(2).
If
username
is valid
then goes
to User
Dashboard
(3).

Photo Storyboard - User Dashboard (3)

Conformation Window(7).

-If Album Text Field is empty. User could not create new album.
-Rename Album must selected the Album that they want to modify.
-Delete Album will delete the selected album from the user dashboard and clear the name displayed in Album Text Field.

The image shows a UI mockup of a 'User Dashboard' for a photo application. At the top center is the title 'User Dashboard'. Below it is a text input field labeled 'Album Name:'. Underneath this field are three buttons: 'Create Album', 'Delete Album', and 'Rename Album'. To the right of these buttons is a 'Photo Search' button, and below that is an 'Open Album' button. In the top right corner, there is a 'Log Out' button. Red arrows and boxes are used to provide annotations: an arrow points from the 'Album Name' field to a box describing its behavior; an arrow points from the 'Delete Album' button to a box describing its function; an arrow points from the 'Photo Search' button to a box describing its function; an arrow points from the 'Open Album' button to a box describing its function; and an arrow points from the 'Log Out' button to a box describing its function.
